

## AHAGLOW S FACE WASH

### For the use only of a Registered Medical Practitioner only

Abbreviated Prescribing information for Ahaglow S Face Wash (Aloe Extract 5%, Salicylic acid 2% with Glycolic acid 1% Foaming Face wash) [Please refer the complete prescribing information available at [www.torrentpharma.com](http://www.torrentpharma.com)]

**PHARMACOLOGICAL PROPERTIES:** *Aloe Vera:* Aloe Vera is a natural product comprises of more than seventy-five effective components, which includes the twenty amino acids and the eight essential amino acids indispensable for the human body. *Alpha hydroxy acid:* Alpha hydroxy acids are a group of natural acids from foods. Some alpha hydroxy acids are gluconolactone; citric, glycolic, lactic, and malic acids and others. *Salicylic acid:* White or colourless acicular crystals or a white or almost white, crystalline powder. Slightly soluble in water; freely soluble in alcohol; sparingly soluble in dichloromethane. **INDICATION:** Rejuvenates the skin by encouraging the shedding of old and dead skin cells. Reduces the number of superficial wrinkles. Improves skin texture and tone. Unblocks and cleanses the pores. It is indicated in acne management or adjuvant treatment in acne management. **DIRECTION FOR USE:** Wet face then gently massage the foam all over the face for 20 to 30 seconds avoiding eyes & surrounding areas. Rinse thoroughly and pat dry. Use twice daily. For gentle cleansing keep maximum up to 30 sec on face. For external use only. Not to be used in children below 3 years. **CONTRAINDICATION:** *Aloe vera:* Contraindicated in cases of known allergy to plants in the liliaceae family. *Salicylic acid:* Salicylic acid is contra-indicated in persons with sensitivity to salicylic acid. **WARNINGS & PRECAUTIONS:** For external use only. Avoid contact with the mouth, eyes and other mucous membranes to avoid irritation. As with other topical preparations containing salicylic acid, excessive prolonged use may result in symptoms of salicylism. This may increase skin's sensitivity to the sun and particularly the possibility of sunburn. **DRUG INTERACTION:** Application of aloe to skin may increase the absorption of steroid creams such as hydrocortisone. **ADVERSE REACTIONS:** Redness, burning, stinging sensation and rarely generalized dermatitis in sensitive individuals, allergic reaction, mild irritant and may cause skin irritation.
