

DEWSOFT PREMIA CREAM

For the use of a Registered Medical Practitioner or a Hospital or a Laboratory only

Abbreviated Prescribing information for DEWSOFT PREMIA CREAM-Advanced moisturizing cream (Aloe vera, aqueous extract of beech tree bud, saccharide isomerate (active) aqua, citric acid, sodium citrate, honey, wheat germ oil, hydroxy propyltrimonium hyaluronate, tea tree oil) [Please refer the complete prescribing information available at www.torrentpharma.com]

PHARMACOLOGICAL PROPERTIES: Aloe vera is a natural product, which comprises of more than seventy-five effective components including twenty amino acids and eight essential amino acids, certain enzymes effective for metabolic health, essential vitamins, minerals, polysaccharides that render immune-stimulating properties and substances such as salicylic acid, saponins and sterols provide its analgesic, anti-inflammatory and antiseptic properties. Tea Tree Oil is the essential oil which contains various mono- and sesquiterpenes as well as aromatic compounds. The cyclic terpenes, terpinene-4-ol and α -terpineol, were shown to affect skin integrity. Wheat germ Oil is clear light brown oil which is one the richest sources of Vitamin E, as well as Vitamin A and D. It is useful for external applications by providing soothing and healing effects on the skin. It helps to heal skin problems like eczema, stretch marks or dry skin. Aqueous extract of the beech tree bud is used to minimize the appearance of wrinkles, aging and to give the skin a healthier look. Honey is a hygroscopic sugary matrix with antibacterial; its antibacterial properties are attributed both to high osmolality and the liberation of hydrogen peroxide. Honey is used in treatment of pimples or Acne based on its antibacterial properties. Honey is having antifungal, nurturing and moisturizing properties for the skin. Hydroxy propyltrimonium hyaluronate remain on the skin and moisten it which provides moist feeling, fresh, smooth and penetrate naturally without clammy feeling. **INDICATION:** For the treatment of dry skin conditions, ichthyosis, atopic dermatitis, eczema, dry scaly skin (including that associated with psoriasis), pruritus, nappy rash, pigmentation, acne scars, melasmas, maintaining the skin integrity, skin irritation, ageing, wrinkles, post-acne scars, post-pimple scars, other skin stains. It is also used for soothing and healing effects of the skin. **BENEFITS:** Keeps skin moisten for 48 hours, ensure longer hydration, paraben free, anti-ageing and reduce fine lines & wrinkles. **DIRECTION FOR USE: For external use only.** Apply a thin film gently on the affected skin area as often as necessary (three to four times daily or as required). Use regularly to get the most benefit from it, especially after bathing or showering and between washing, while the skin is still damp. If topical corticosteroids are being used as well, moisturizing cream should be applied after the steroid. **CONTRAINDICATION:** In patients with hypersensitivity to any of the ingredients. **WARNINGS & PRECAUTIONS:** Keep away from eyes and mucous membranes. In case of any accidental contact, eyes should be thoroughly washed with water. Mild burning / stinging might occur. If there is severe discomfort, discontinue use. The immediate use of soaps and detergents should be avoided after application of the cream.
