[Please refer the complete prescribing information available at www.torrentpharma.com]

PHARMACOLOGICAL PROPERTIES:

MECHANISM OF ACTION: Glycerin and purified water Glycerin is a humectant, a type of moisturizing agent that pulls water into the outer layer of your skin from deeper levels of your skin and the air. Phenoxyethanol (And) Ethylhexylglycerin Phenoxyethanol is known to cause allergic-type reactions on the skin in some people. Colloidal Oatmeal *Skin protection* The use of colloidal oatmeal as a skin protectant is regulated by the U.S. Food and Drug Administration (FDA) according to the Over-The-Counter Final Monograph for Skin Protectant Drug Products issued in June 2003. *Moisturizing* The hydration of the skin is one of the most important agents involved in preserving the integrity of the stratum corneum barrier. Oatmeal is a good option for moisturizing of dry or sensitive skin. *Cleansing* Avenacins are other phenolic esters in oat which structurally belonging to saponins. *Saponins* have a soap-like action for this structure. Accordingly, saponins are mostly responsible for the cleansing activity of oat. Vitamin E acetate Vitamin E is an important ingredient in many cosmetic products. It protects the skin from various deleterious effects due to solar radiation by acting as a free-radical scavenger. Cetyl Alcohol & Stearyl Alcohol: Cetyl alcohol exhibits skin protect properties against skin irritations caused by bites, rashes and stings. Stearyl Alcohol is used as an emollient, emulsifier, and thickener in ointments, and is widely used as a hair coating in shampoos and hair conditioners. Castoryl maleate Castoryl maleate is a lipid analogue with good affinity to the skin and superior moisturization on wash off Lipids found in healthy, moisturized skin are typically in a lamellar gel crystalline state that is responsible for the skin's barrier function.

INDICATIONS: For anti-Inflammatory action (anti-itch activity, atopic dermatitis, psoriasis), skin protection, moisturizing, cleansing.

DOSAGE AND ADMINISTRATION: Skin Cleanser (Topical), *With Water:* Apply Ahaglow Gentle Skin Cleanser on moist skin and massage gently, Rinse with water after application and pat dry with a soft towel, avoid scrubbing your skin, Repeat 2-3 times a day, for best results use daily. *Without Water:* Dispense Ahaglow Gentle Skin Cleanser onto a cotton pad. Gently rub and wipe away.

CONTRAINDICATION: Contraindications have not yet been identified.

WARNINGS & PRECAUTIONS: Glycerin In certain conditions, glycerin can dehydrate the skin. If after applying, any signs of an allergic reaction, such as itchiness or redness is observed, stop using the product immediately. Vitamin E acetate Vitamin E acetate may cause a local skin reaction like reddening or a rash in the applied. Phenoxyethanol (And) Ethylhexylglycerin Phenoxyethanol is known to cause allergic-type reactions on the skin in some people. Ethylhexylglycerin is not safe due to its performance as a contact allergen. However, anyone can be exposed to the possibility of dermatitis and skin irritation as a result of ethylhexylglycerin. Colloidal Oatmeal An allergic reaction to oatmeal would cause symptoms like itching, swelling, and redness. If this occurs, wash your skin with soap and water and discontinue the use of oatmeal-containing products. Castoryl maleate this medication contains castor oil. Do not take Fleet Castor Oil or Emulsoil if you are allergic to castor oil or any ingredients contained in this drug. Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center immediately. Digestive tract irritation following oral ingestion, skin contact sensitization, and contact dermatitis have been reported for castor oil.

DRUG INTERACTIONS: We currently have no information for interactions.

ADVERSE REACTIONS: Vitamin E acetate: redness, burning, stinging sensation and rarely generalized dermatitis in sensitive individuals. Allergic reactions like skin rash, itching or hives, swelling of the face,

lips, or tongue. Severe burning, irritation, crusting, or swelling of the treated areas. Colloidal Oatmeal burning, stinging, redness or irritation. Castoryl maleate dizziness, abdominal cramps, diarrhea, nausea, electrolyte disturbance, low blood pressure and pelvic congestion.
