**PHARMACOLOGICAL PROPERTIES:** Aloe vera is a natural product which comprises of more than seventy-five effective components including twenty amino acids and eight essential amino acids, certain enzymes effective for metabolic health, essential vitamins, minerals, polysaccharides that render immune-stimulating properties and substances such as salicylic acid, saponins and sterols provide its analgesic, anti-inflammatory and antiseptic properties. Tea Tree Oil is the essential oil which contains various mono- and sesquiterpenes as well as aromatic compounds. The cyclic terpenes, terpinene-4-ol and  $\alpha$ -terpineol, were shown to affect skin integrity. Wheatgerm Oil is clear light brown oil which is one the richest sources of Vitamin E, as well as Vitamin A and D. It is useful for external applications by providing soothing and healing effects on the skin. It helps to heal skin problems like eczema, stretch marks or dry skin. Honey is a hygroscopic sugary matrix with antibacterial; its antibacterial properties are attributed both to high osmolality and the liberation of hydrogen peroxide. Honey is used in treatment of pimples or Acne based on its antibacterial properties. Honey is having antifungal, nurturing and moisturizing properties for the skin.

**INDICATION:** Nutrient rich moisturizer which is effective for dry skin conditions, itchy rash, dry scaly skin (including that associated with psoriasis), cold sores, eczema, dermatitis, mild to moderate acne, maintaining the skin integrity and skin irritation. It is also having soothing and healing effects.

**CONTRAINDICATION:** In patients with hypersensitivity to any of the ingredients.

**DIRECTION FOR USE:** Apply to the affected area as required. Use regularly specially after washing/bathing. Spread uniformly. For external use only. Shake well before use.

**EXPIRY DATE:** Do not use after date of expiry.

**STORAGE:** Store at temperature below 25°C. Do not freeze. Keep out of reach of children.
