

## ESAM AT

**For the use only of a Registered Medical Practitioner or a Hospital or Laboratory**  
Abbreviated Prescribing information for ESAM AT (Atenolol 50 mg and S-Amlodipine Besylate 2.5mg Tablets) [Please refer the complete prescribing information available at [www.torrentpharma.com](http://www.torrentpharma.com)]

**PHARMACOLOGICAL PROPERTIES:** *Atenolol:* Atenolol is a selective and long acting beta-1adrenoreceptor antagonist. *S-Amlodipine:* It is a long-acting calcium channel blocker that inhibits the transmembrane influx of calcium ions into vascular smooth muscle and cardiac muscle.

**INDICATION:** In the treatment of essential hypertension and angina pectoris.

**DOSAGE AND ADMINISTRATION:** The recommended dose is one tablet once daily taken with or without food.

**CONTRINDICATIONS:** In patients allergic to either of the component drug.

**WARNINGS & PRECAUTIONS:** Caution required for Bronchospastic Diseases, Anesthesia and Major Surgery, Diabetes and Hypoglycemia, Thyrotoxicosis, Impaired Renal or hepatic Function and Cardiac Failure.

**DRUG INTERACTIONS:** Catecholamine-depleting drugs (e.g., reserpine) may have an additive effect. Calcium channel blockers may also have an additive effect. Beta-blockers may exacerbate the rebound hypertension, which can follow the withdrawal of clonidine.

**ADVERSE REACTIONS:** Bradycardia, cold extremities, postural hypotension, leg pain, dizziness, vertigo, light headedness, fatigue, diarrhea, nausea, wheeziness, tiredness, lethargy, drowsiness, depression, dyspnea, elevated liver enzymes and/or bilirubin, hallucinations, headache, impotence, peyronie's disease, postural hypotension associated with syncope, psoriasiform rash or exacerbation of psoriasis, psychoses, purpura, reversible alopecia, thrombocytopenia, visual disturbances, fever, respiratory distress, short-term memory loss, ischemic colitis, erythematous rash and raynaud's phenomenon. edema, flushing, abdominal pain, somnolence, palpitations, muscle cramps, frequency of micturition or nocturia, coughing, breathlessness, epistaxis, impotence, nervousness and conjunctivitis.
