

SUNPROTECT SPF 50

For the use of a Registered Medical Practitioner or a Hospital or a Laboratory only

Abbreviated Prescribing information for SUNPROTECT SPF 50 (Octinoxate 7.5 %, Oxybenzone 3.0%, Avobenzone 2.0% and Octocrylene 3.0%, Zinc oxide 2.0%) [Please refer the complete prescribing information available at www.torrentpharma.com]

PHARMACOLOGICAL PROPERTIES: The four active ingredients share a common basic mechanism of action. The molecules are raised to a state of higher state of energized orbital on absorption of photons from UV radiation. This energized state is highly unstable and is rapidly converted to a more stable form by losing energy and attaining ground state. The energy released is of a longer wavelength (lower energy) that does not damage biological structures.

INDICATION: A sunscreen lotion for prevention of sunburn skin.

DIRECTION FOR USE: Take adequate amount of lotion & apply on the face, neck and exposed area of the skin 15-30 min prior to sun exposure. There is no recommended dosage for children below 6 months of age except under the supervision of the doctor.

CONTRAINDICATION: Avoid prolonged exposure to sun. Sun-sensitive persons particularly should exercise caution. If irritation or sensitization occurs, discontinue use. Do not use sunscreens on eczematous or inflamed skin. Vitamin D deficiency may occur in elderly patients.

WARNINGS & PRECAUTIONS: Avoid contact with eyes. Flush water immediately in case of accidental contact. Do not swallow. Rinse with water to remove. Reapply after swimming, sweating, physical activity or advised. Discontinue use, if signs of irritation or rash appear. Wear protective eye covering or sunglasses. UV can cause corneal damage. Keep out of reach of children. Shake well before use. Use under medical supervision. Keep the cap tightly closed after used. For external use only.

ADVERSE REACTIONS: Dryness, Acne, Burning, itching or stinging of skin, Early appearance of redness or swelling of the skin, Late appearance of rash with or without weeping blisters that become crusted, Pain in hairy areas, Pus in hair follicles Other side effects may occur that usually do not require medical attention. These side effects may disappear as your body adjusts to the product. However check with your doctor if these become bothersome.
