VIZYLAC RICH

For the use of a Registered Medical Practitioner or Hospital or a Laboratory only.
Abbreviated Prescribing information for VIZYLAC RICH (Probiotic-Prebiotic & lmmunobiotic Capsules)

[Please refer the complete prescribing information available at www.torrentpharma.com]

PHARMACOLOGICAL PROPERTIES: *Streptococcus faecalis* colonizes the human gut and helps in normalization of gut flora, stimulation of mucosal immunit. *Clostridium butyricum* decreases intestinal pH. *Bacillus mesentericus s*electively stimulates the growth of beneficial anaerobic bacteria and inhibits the growth of pathogenic bacteria. It also helps to decrease secretion of luminal enterotoxin. *Lactobacillus sporogenes* replaces pathogenic organisms in the GI tract by lactobacilli, elicitates an immune response, lowers fecal pH, and interfers with the ability of pathogenic bacteria to adhere to intestinal mucosal cells. *Saccharomyces boulardii* the exact mechanism of *Saccharomyces boulardii* is not clearly defined. It may exert a protective effect in the gastrointestinal tract via stimulation of the intestinal secretion of secretory IgA.

DOSAGE AND ADMINISTRATION: As directed by the physician.

CONTRAINDICATION: Hypersensitivity to any of the ingredients, Hypersensitivity to lactose or milk, Immunocompromised state.

WARNINGS & PRECAUTIONS: Patients sensitive to milk should not use lactobacillus products, use in severely ill and malnourished children and use in severely ill adults having terminal illness.

DRUG INTERACTION: No data available.

ADVERSE REACTIONS: Constipation, gas, bloating, itching, hiccups, urticaria, exanthema, quincke's edema and systemic mycosis have been reported.

Chest pain, endocarditis, septicemia have been reported during treatment However, it is unknown whether this symptoms were due to probiotic therapy or to concomitant antibiotic therapy.
