

COBASOFT INJ

For the Use of a Registered Medical Practitioner or a Hospital or a Laboratory Only

Abbreviated Prescribing information for COBASOFT INJ (Methylcobalamin 500mcg/ml injection)
[Please refer the complete prescribing information available at www.torrentpharma.com]

PHARMACOLOGICAL PROPERTIES: Methylcobalamin is one of the two coenzyme forms of vitamin B12. It is a cofactor in the enzyme methionine synthase. Methylcobalamin promotes nucleic acid and protein synthesis and also phospholipid synthesis.

INDICATIONS: For the treatment of peripheral neuropathies and megaloblastic anemia caused by vitamin B12 deficiency.

CONTRAINDICATION: Hypersensitivity to cobalamin products or cobalt.

WARNINGS & PRECAUTIONS: The prolonged use of larger doses of Methyl-Cobalamin is not recommended for patients whose occupation requires the handling of mercury or mercury compounds. Use cautiously with cardiovascular disease, lung disease and hypertension.

DRUG INTERACTIONS Metformin, histamine H-2 receptor antagonists (cimetidine, ranitidine, etc), aminoglycosides, colchicine, aminosalicic acid, anticonvulsants and alcohol decrease absorption of vitamin B-12. Don't use with chloramphenicol.

ADVERSE REACTIONS: Anorexia, Nausea, Vomiting, Diarrhea and Rash
